

Risk Management Refresher Course (4 hours)

Synchronous E-learning / In-person

Overview

Under the WSH (Risk Management) Regulations, risk management must be conducted at all workplaces to identify workplace hazards, evaluate risks and implement control measures.

The Code of Practice on WSH Risk Management (RMCP), 3rd Revision, was launched on 10 November 2021. The key changes to the risk management process include workplace preparedness for infectious disease outbreaks, employee mental well-being and terrorist threats.

This 4 hours course aims to refresh duty holders of their obligations under the WSH (Risk Management) Regulations and to empower participants with the knowledge on the systematic process in risk assessment and risk management.

Objective

This course aims to empower the participants to have knowledge in filling up the three forms below in line with the latest Code of Practice in Workplace Safety & Health Risk Management (3rd Revision) in November 2021 and in compliance with WSH (Risk Management) Regulations:

- Inventory of Work Activities form
- Risk Assessment Form
- Risk Register Cover Sheet

This course is required for all RM Leaders of organisations and RA Leaders of departments, functions or locations, and all RA members to refresh their knowledge of risk assessment and risk control methodologies and lead their organisations/departments/functions/locations to comply with the WSH (Risk Management) Regulations.

Participants will work on their real work scenarios in various workshop group exercises throughout the course. Participants from the same organisations will be grouped together for more effective and relevant group discussion and application.

Who Should Attend?

Risk Management Leaders / Risk Assessment Leaders/ Risk Assessment Members of all departments in organisations.
