

## **bizSAFE Level 3 Audit Preparation Course**

### **Synchronous E-learning**

---

#### **Mode of Training**

##### **Interactive Virtual Class (via Zoom)**

Get audit-ready from the convenience of your office or home.

#### **Overview**

As of **1 January 2026**, all Risk Management (RM) implementation audits in Singapore must adhere to the **revised RM Audit Checklist**. This high-standard audit is mandatory for all companies applying for or renewing **bizSAFE Level 3, Level 4, and STAR** certification.

The 2026 framework has “raised the bar” significantly, introducing 28 Main Audit questions, 5 Audit Highlights, and 34 Interview References. Key new requirements include:

- **Mandatory Speed Limiter Verification:** Auditors will now strictly verify speed limiter installation and maintenance for lorry fleets (effective 1 Jan 2026).
- **Expanded Risk Categories:** Inclusion of work-organization factors, individual health risk factors, and mental health considerations.
- **SGSecure & Terror Threats:** Enhanced focus on managing security and terror-related risks within the workplace.

#### **Objective**

This 1-day intensive workshop is designed to remove the “guesswork” from your upcoming audit. Our objective is to empower your team to:

1. Interpret Every Question: Understand the “intent” behind each audit question.
2. Conduct a Gap Analysis: Identify missing evidence or documentation in your current RM system before the audit.
3. Hands-on Workshops: Participate in practical sessions to develop new plans, policies, and templates that meet the 2026 standards. Our Virtual Classroom setting allows teams to share digital documents in real-time for immediate review and feedback by our Trainer (practising WSH Auditor).
4. Audit Readiness: Group discussions to ensure your team can confidently handle auditor interviews.

Taught by practising WSH Auditor(s).

#### **Who Should Attend?**

To ensure effective implementation, we recommend that **Risk Management (RM) and Risk Assessment (RA) Leaders** attend together. This includes:

- Managers/HODs of Operations, Engineering, and Logistics.
- HR Professionals (for mental health and appraisal-linked safety).
- Safety and Security Officers.
- *Recommended: Attend as a team to align your documentation and procedures in real-time.*

The Virtual (Zoom) format is ideal for regional teams or multi-site managers to align their RM standards without the need for travel.

#### **Pre-requisites**

Participants must have completed the “**bizSAFE level 2 Risk Management Course**”. We strongly recommend that this be completed recently to ensure familiarity with the latest WSH (Risk Management) Regulations.

## Course Outline

- Introduction to the 2026 RM Audit requirements
- Ways to meet 2026 RM requirements.
- Workshop to prepare for 2026 RM audit questions.
  - 1.1: WSH Policy
